Thank you for purchasing the RevIndustries high-capacity Speedloader!

Please scan QR code for instruction manuals

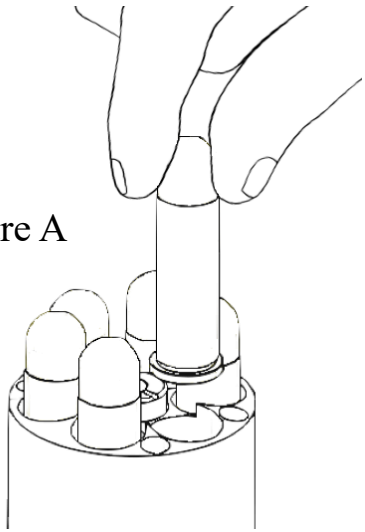
The RevIndustries speedloader is the fastest and highest capacity speed loader on the market. Our patent pending design provides rapid loading and automated locking in a single push motion. The RevIndustries Speed Loader holds up to 3 reloads in a single device. Our speedloader is a "must have" for defense, competition, and range shooting.

Patented **Assembled, Tested, And Packaged in USA**

Instructions For Loading RevIndustries High-Capacity Speedloader

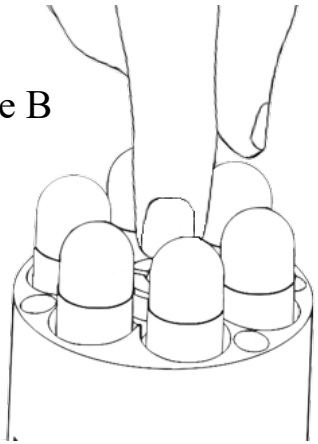
***** Read All Instructions Before Loading and Use *****

Figure A



Step 1 (Figure A) – Rest bullets in each cylinder with projectile side facing upwards. **Note:** Do not force bullets past resting point as damage may occur.

Figure B



Step 2 (Figure B) – Firmly press down the center button until the bullets drop into the speedloader.

Instructions For Loading Revolver

Step 1 (Figure C) – Point revolver barrel straight downwards with cylinder open.

Step 2 – Align RI Loader vertically and guide bullets into cylinders until RI Loader's button touches cylinder ratchet.

Step 3 – Press down on RI Loader, firmly and quickly.

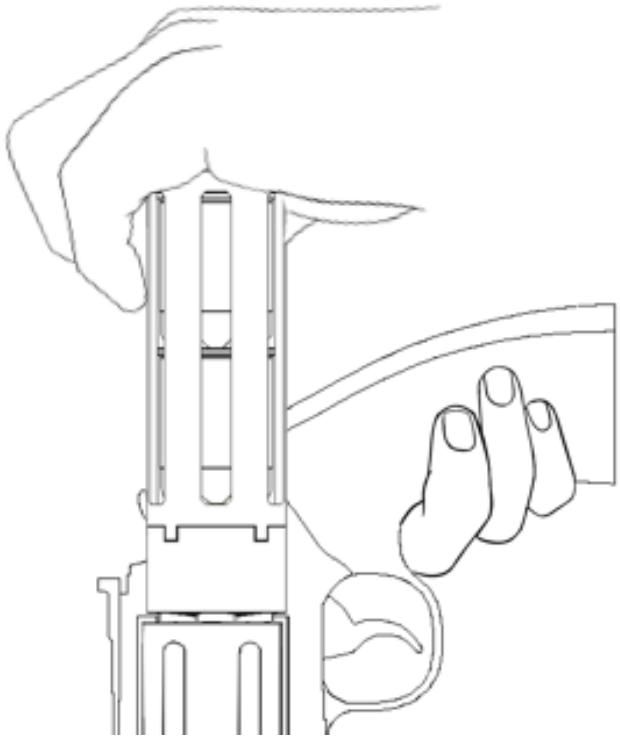


Figure C

Caution: For use with Flat Point, Hollow Point, Round Nose Flat Point, and Soft Point projectiles only. Inspect bullets to ensure primers are recessed into casing. Not for use with rounded and pointed projectiles, as projectile's tip may come into contact with adjacent bullet's primer – causing dangerous discharge.

Customer Service / Warranty: The RevIndustries High-Capacity Loader comes with a 1-year warranty. RevIndustries stands by our product. We will replace our speedloader, for any reason, at no charge*. For detailed warranty and service information, please visit www. RevIndustries.com
